COMPONENT DESCRIPTION

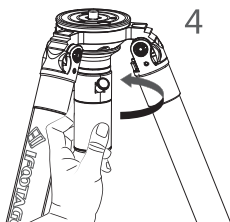

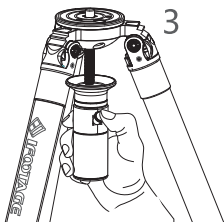

01

Using the ball head quick release handle

1 To release ball head, turn handle 1 rotation anti-clockwise

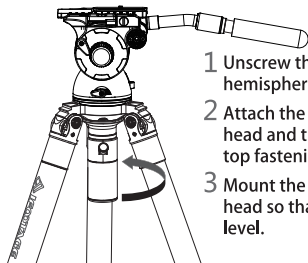

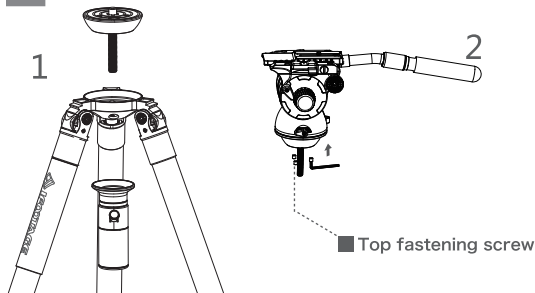

2 Press release button on handle and pull down

3 To re-attach, press the release button and push handle up towards ball head

4 Release button and rotate handle clockwise to lock

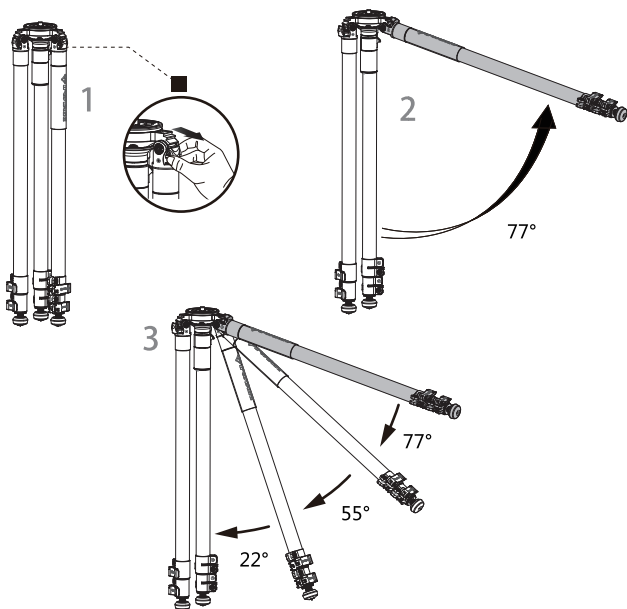

02 Head connection

- 1 Unscrew the lock mechanism to remove hemisphere base.
- 2 Attach the hemisphere base to the flat video head and tighten 3/8" screw. Tighten the three top fastening screws.
- 3 Mount the unit onto tripod and adjust the ball head so that it is horizontal, using the spirit level.

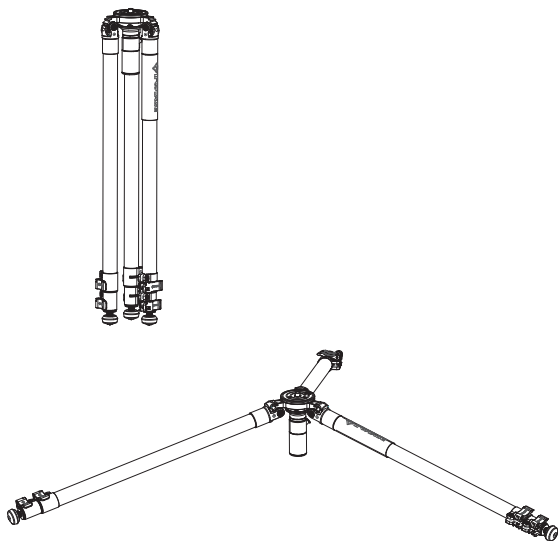

03

Angle of adjustment for legs

- 1 Pull the leg lock system button located at the top of the leg "up" .
- 2 Raise the leg which will automatically lock into one of three preset position/angles.
- 3 Each leg will lock automatically at the following angles: 77° , 55° or 22° .

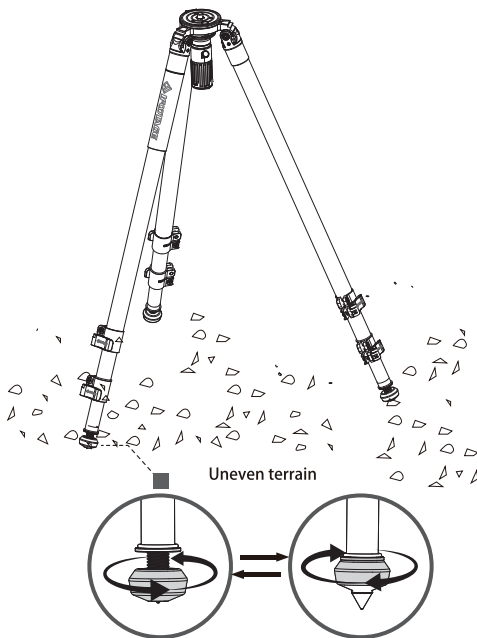

04 Low angle usage

For low angle usage, retract all three legs and adjust to 77° angle setting.

05

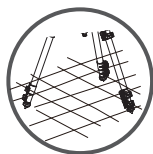

Using the foot pads and spikes

Muddy terrain

Ice

Slippery or wet surfaces

Rotate each rubber footpad to reveal the foot spike and turn in opposite direction to enclose the foot spike.

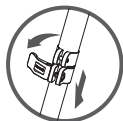

The dual option of foot pads and spikes allows you to use the tripod in a variety of locations and conditions.
